SUMMARY

Frontend Developer with over five years' experience building responsive, WCAG-compliant AEM and React applications for enterprise pharmaceutical brands including Takeda, AbbVie, and Bristol Myers Squibb. Deliver scalable HCP and patient experiences, reusable components, and high priority launches in regulated Agile environments.

SKILLS

Frontend Development: JavaScript ES6+, TypeScript, ReactJS, Node.js, HTML5, CSS3, SASS/SCSS, Tailwind CSS, jQuery

AEM and CMS Platforms: Adobe Experience Manager, AEM Components, Experience Fragments, AEM ClientLibs, Contentful, DAM, Veeva Vault/CRM

Accessibility and Quality Assurance (QA): WCAG 2.1/2.2, Siteimprove, Responsive Design, Mobile-First Development, Cross-Browser Testing, Sauce Labs, SEO Basics

Tools and Analytics: Azure DevOps, Git, GitHub, Jira, Figma, Sketch, Google Analytics, Segment, Looker, MySQL, VS Code, Xcode

Methodologies: Agile, Scrum, SDLC, Sprint Planning, Backlog Refinement, Defect Management, User Stories

Leadership and Collaboration: Cross-Functional Team Collaboration, Stakeholder Communication, Problem Solving, Mentoring, Project Ownership

PROFESSIONAL EXPERIENCE

EVERSANA INTOUCH, Overland Park, KS

11/2022 – 04/2026

Frontend Developer (AEM)

- Led frontend execution across 15+ enterprise pharmaceutical websites for Global 500 brands, delivering regulated CMS updates, responsive UI enhancements, post-approval content, and multi-brand releases.
- Developed seamless HCP and Patient web experiences for enterprise pharmaceutical brands, ensuring regulatory compliance, accessibility, responsive behavior, and brand consistency.
- Built and maintained custom AEM components for five major pharmaceutical clients, supporting interactive calculators, infusion modules, reusable content structures, and dynamic patient-profile experiences.
- Maintained 90+ Siteimprove accessibility scores across high-traffic pharmaceutical websites through WCAG-compliant development, semantic HTML, responsive testing, and cross-browser QA.
- Earned *Magnificent Seven Award* for exceptional ownership, transparent communication, and independently leading high-priority frontend workstreams across regulated AEM launches.
- Created a Microsoft Copilot AI agent to support frontend development, debugging, reusable component analysis, documentation, and QA handoff processes.
- Optimized frontend performance through AEM ClientLib audits, lazy loading, and asset-loading improvements, resulting in faster page load times and improved mobile performance.

- Converted Figma, Sketch, and Photoshop designs into pixel-perfect responsive interfaces while collaborating with UX, PMs, QA, Creative teams, and stakeholders to resolve complex dependencies and ensure seamless production launches.
- Improved frontend maintainability using AI-assisted workflows to refactor repetitive code, validate AEM updates, and streamline release readiness.
- Implemented reusable Experience Fragments and dynamic content rendering across enterprise AEM sites, improving content reuse and authoring efficiency across treatment journey pages.
- Delivered frontend enhancements for PDUFA milestones, post-approval updates, and enterprise brand launches, improving engagement through responsive banners, CTA optimization, and content visibility.
- Managed Agile development workflows using Azure DevOps, Git, and GitHub while coordinating asset synchronization through Veeva Vault.

GDH CONSULTING INC., Tulsa, OK

05/2022 - 11/2022

Frontend Developer

- Developed responsive healthcare web applications and HCP/Patient-facing experiences using JavaScript, TypeScript, HTML5, CSS3, and reusable UI components.
- Built mobile-first layouts, campaign landing pages, and interactive frontend components aligned with accessibility, usability, and SEO best practices.
- Collaborated with UX designers, PMs, QA teams, and developers in Agile sprint cycles to resolve defects and deliver production-ready releases.
- Utilized Azure DevOps and GitHub for sprint tracking, version control, bug management, and feature delivery coordination.

REAL WORLD TECHNOLOGIES INC., Wixom, MI

07/2020 - 10/2021

Web Developer

- Migrated multi-page user experiences into a Single-Page Application (SPA), increasing customer engagement from 4% to 8%.
- Implemented mobile-first e-commerce functionality, contributing to a 10% increase in website traffic.
- Improved frontend maintainability by resolving UI defects, refining reusable components, and optimizing responsive page performance.

XAPADS MEDIA PVT. LTD., UP, India

01/2015 - 09/2016

Software Programmer

- Developed responsive web applications and merchandising pages using JavaScript, TypeScript, HTML5, and CSS3 while integrating backend APIs for scalable delivery.
- Collaborated in full-lifecycle Agile development to estimate, build, test, and deploy client-focused solutions aligned with business requirements.
- Contributed to four client projects in fast-paced, deadline-driven digital advertising and AdTech environments.
